4 Days Serengeti National Park and Ndutu Area | 2 Clients

DAY 1: Mwanza to Ndutu Area

Early morning meet with our driver guide, briefing and start to depart to Serengeti National Park. Arrive in Serengeti and do en-route games drive to Ndutu Area.

Lake Ndutu area, situated in the Ngorongoro conservation area, part of the southern Serengeti eco-system. Lake Ndutu is alkaline, like most of the other Rift lakes; however the water is still drinkable and used by a wide array of local wildlife. The majority of the wildebeest migration can normally be found on the short-grass plains from December to April. The area is usually heavily populated with elephant, birds and resident game.

Dinner and Overnight at Serengeti Heritage Camp (FB)

Day 2: Game Drives in Ndutu Area – Serengeti National Park

After breakfast, enjoy a game drive in the Ndutu area; explore the range of different habitats that include swamps, woodland, soda lakes and the world famous Serengeti short grass plains. See great herds of wildebeest and zebra. During a short time frame around February, normally lasting for about 3 weeks, the majority of the wildebeest calve. The grass provides little cover and the young are easy pickings for a variety of predators. Wildebeest calves can run minutes after they are born and within 3 days they are normally strong enough to keep up with the herd.

DAY 3: Fully Day Serengeti National Park

Two game drives in this day. In the morning before breakfast go for sun-rise game drives for about 1-2hours then back to your camp for breakfast and pick up your lunch boxes then drive for the afternoon and evening game drive in endless plain.

Serengeti National Park is immense; it spans roughly 30,000 km² (12,000 sq. mi). It's the oldest park in Tanzania and most complex ecosystem on earth. The flora and fauna are almost the same as hundreds of centuries ago.

There is so much to see and keep you occupied in Serengeti National Park. One of the best places to spot large predators like lions, leopards, cheetahs and hyenas is Seronera Valley. You can also see elephants, zebras, elephants, giraffes, wildebeest and many other species on any given day.
